Summary Report: Responsive multi-section landing page

1 Name: Atharv Waghamre

2 Email: atharvw0@gmail.com

3 Contact No: 7588088688.

4 Zip File Link (GitHub):

<https://github.com/AtharvWaghamre/Responsive-multi-section-landing-page.git>.

5 Key Features:

- **Hero Section (Full-Screen Banner)**
- **Navigation Bar (Sticky & Responsive)**
- **Features Section (Grid-Based Showcase)**
- **About Us Section (Team Introduction)**
- **Services Section (Interactive Cards)**
- **Testimonials Section (Dynamic Slider)**
- **Pricing Section (Comparison Table)**
- **FAQ Section (Collapsible Accordion)**
- **Blog Preview Section**
- **Contact Us Section**
- **Newsletter Subscription Section**
- **Footer Section**

6 Language Use:

- **HTML:** For the structure of the page and layout.
- **CSS:** For styling and responsiveness of the layout.
- **JavaScript:** Client-side validation to ensure proper input before submission & Animation.

7 Team Contribution:

- **Harsh Jadhav (UI/UX Designer)** – Designed the layout prototype using Figma/Adobe XD and ensured an intuitive user experience.
- **Atharva Waghmare (Components & Layout)** – Developed the responsive HTML and Bootstrap layout, creating reusable components.
- **Harshal Tasgaonkar (Animations & Effects)** – Implemented animations, hover effects, and JavaScript-based dynamic interactions.
- **Aditya Varnekar (Forms & Validation)** – Developed the contact form with JavaScript validation and interactive elements.

8 Conclusion: This project successfully delivers a high-quality, interactive, and responsive landing page that enhances user engagement and accessibility. The collaboration between UI/UX design, front-end development, animations, and form validation ensures a seamless user experience. By following best coding practices and optimizing for performance, the team has created a scalable and maintainable web page. The structured approach and clear documentation further allow for easy future modifications and improvements. The final product meets all specified requirements and is ready for deployment.

9 Dead-Line: February 13th, 2025.
